HDC is authorized partner of Wendt GmbH for machine RETROFIT

Cooperation between WENDT/3M and HDC provides future perspective for existing WENDT grinding machines

On behalf of WENDT, HDC Huttelmaier offers extensive overhauling, modifications and complete RETROFIT work on high precision WENDT grinding machines. An ideal combination, as HDC is already renewing used grinding machines in the third family generation to

the current state of the art. In close cooperation with the technology and design department of WENDT, HDC Huttelmaier carries out these RETROFIT programs in its own machine construction plant.

Our core competences at HDC:

RETROFIT

Mechanical and geometrical renovation of machine tools is our key competence. We can update your production equipment. You choose a general overhaul or a modernization of your machine tools.

SPECIAL MACHINERY

If we can think it – we can build it! Based on deep practical knowledge we create and build solutions for your special purpose.

MACHINE GUARDS

Finnsafety guards protect the worker and the working environment from both, immediate and temporary risks.
